Relevant Coursework

- Data Structures
- Algorithm Analysis
- Database Management Systems
- Operating Systems
- Computer Networks
- Object Oriented Programming

Projects

Recruiter Email Automation System (Group Project) | Python, Flask, Streamlit

- Built and deployed an AI-powered recruiter email automation system that matches recruiters based on skills and sends personalized emails using Gmail SMTP.
- Developed backend logic including recruiter matching algorithm, email automation workflow, and deployed the solution as a Streamlit MVP.

Restaurant Website | HTML, CSS

- Designed and developed a multi-page restaurant website as a first semester project with structured navigation and menu categories.
